Bluedrop's **Portable Hoist Mission Training System** is a fully immersive virtual training device for hoist continuum training.

Whether performing standalone training or linking with a flight training device, the Portable HMTS provides operators:

Ultra-realistic cable behavior that responds to flight dynamics.

Rotor wash effects and human-in-the-loop real time operator inputs.

Ability to perform high-fidelity mission rehearsal including on-the-fly mission changes such as weather or malfunctions.

For further information about our HMTS & Portable HMTS, please visit our website and contact our sales department.

Train for dangerous operations, malfunctions, and emergencies in a safe environment.

The Portable HMTS sets up in minutes and is deployable anytime, anywhere.
