

MTS
MISSION TRAINING SYSTEM

Simulation-As-A-Service (SimAAS)

is a cost-effective option to provide rear crew training for multiple mission scenarios.

The real-world feel and high fidelity of the hoist training facilitates the practice of hoist operations in a safe, operationally relevant environment that will maximize crewmember proficiency.

Key Benefits:

The SimAAS training approach reinforces learning outcomes so that skills related to situational awareness and crew interaction are delivered as simulator sessions in the Hoist Mission Training System. This reduces the scope of training completed on the aircraft, which reduces the cost and improves the allocation of resources and provides just-in-time training option prior to a flying mission.

SimAAS can be provided in the following cost effective scenarios:

1. Hoist Training Equipment with Bluedrop provided instructor and courseware (4 Students)

Courses	Ground School		Sim Hours
Basic Hoist Operators Course	5	Incl	40
Advanced Hoist Operators Course	5	Incl	40
Overland Hoist	1	Incl	6
Open Water Hoist	1	Incl	6
Confined Area Hoist	1	Incl	6
Shipboard Hoist	1	Incl	6
Mountain Cliff Work Hoist	1	Incl	6
Aerial Gunnery	1	Incl	6
Fast Rope Insertion	1	Incl	6
Sling Load	1	Incl	6

2. Hoist Training Equipment with customer supplied instructor and courseware

3. Portable Hoist Training Equipment sent to customer facility with options for Bluedrop provided instructor and courseware
