TRAINING & SIMULATION

The Learninglogics® Learning Content Management System (LCMS) is a robust online environment used to create, edit, store, assemble and publish training content.

Automated Data Conversion

75-90% - faster than manual conversion methods

Configuration Management

60% - efficiency gains in maintaining linked training documentation in one location

Templating and Reuse Features

40% - improvement in development timelines

Automated Translation

50% - reduced effort

LCMS: Perfect replacement for IBM Kenexa

Key Benefits:

- Collaboration – Multiple organizations and multiple roles can collaborate within the content development and maintenance process.

- Web-Based System – A completely web-based system for content and course management.

- Out-of-Box Usability – Learninglogics® does not require complex coding expertise. Instructors can be up and running immediately with minimal instruction.

- Standards Based – Supports the standards of ADL's Sharable Content Reference Model (SCORM) for web-based learning.

Bluedrop
TRAINING & SIMULATION

Learninglogics® lets instructors, subject matter experts (SME's) and courseware developers easily build state-of-the-art courses and technical documentation.

Predefined Templates – Choose from a wide range of predefined templates that allow the instructor to integrate a range of web-compatible multimedia.

Integrated Content Development – Allows instructors to search for graphics, track usage, audit and reuse media from a centralized library.

Automated Translation Import/Export – The comprehensive glossary is automated to provide an electronic cross reference tool. The glossary is searchable by students from the courseware interface.

Fully Configurable Interface – The LCMS interface can be configurable to reflect an organization's desired look and corporate brand.

LCMS
Centralized Repositories

Integrated Version Control – Complete configuration management of all assets contained within the central content repository. Built-in version control ensures only the latest version is used.

Integrated Review Process - Easily review, assign review and edit across all created courseware and report on changes made.
