

Learninglogics Learning Content Management System

Course creation made easy

Quickly and easily build state-of-the-art courses and technical documentation with the **Learninglogics® Learning Content Management System (LCMS)** from Bluedrop. This robust online environment streamlines content creation, helping subject matter experts (SMEs) and course developers create, edit, store, assemble, and publish training content in less time.

- **75-90%** faster data conversions using automation
- **40%** improvement in development times with templating and reuse features
- **60%** quicker document maintenance thanks to a centralized and linked repository
- **50%** reduction in translation times through automation

Benefits

Additional benefits of using Bluedrop LCMS:

- ✓ **Drives collaboration:** Multiple organizations and roles can create, review, and maintain course content.
- ✓ **Streamlines approvals:** Easily assign reviews, evaluate content, and make edits across all created courseware, tracking comments by version.
- ✓ **Personalizes learning:** Create self-paced or instructor-led courses for individuals or groups.
- ✓ **Simplifies the user experience:** Users can get started immediately with minimal instruction due to an intuitive and customizable interface.

The Bluedrop LCMS

provides an intuitive and powerful web-based platform to:

- Create, edit, and review course content
- Publish and store training documents
- Assemble and publish training materials
- Create and maintain user records
- Track progress and performance
- Create reports
- Comply with industry learning standards

FEATURES

- **Fully configurable interface:** Tailor the user experience to align with an organization's visual brand identity.
- **Predefined, multimedia-ready templates:** Choose from a wide range of templates that enable instructors to include web-compatible multimedia.
- **Centralized content libraries:** Search for graphics, track their use, audit impact, and reuse media from a consolidated library.
- **Integrated version control:** Safely configure and manage all assets in the central content repository; embedded version control ensures only the latest version is used.
- **Automated translations:** An automated, comprehensive glossary can be cross-referenced and is searchable by students from the courseware interface.
- **Standards-driven:** Support the standards of ADL's Sharable Content Reference Model (SCORM) for web-based learning.

Explore the complementary Learninglogics® Training Document Manager (TDM):

The TDM simplifies and centralizes the creation, approval, publication and maintenance of training schemas and document templates, including Qualifications Standards and Plans (QSPs), Qualification Standards (QSs), Training Plans (TPs), or any Course Control Document (CCD). Create templates or use one of the defaults provided within the module. TDM can be used alone or with Bluedrop LMS or LCMS.

Bluedrop Training & Simulation helps optimize training outcomes for demanding situations, ensuring peak performance in high-risk, complex environments. Contact us today to explore how we can revolutionize your learning initiatives and advance your development efforts.
