# Explore Bluedrop's V-Ship Virtual Platform

The **V-Ship Virtual Platform** is an immersive training solution featuring the Royal Canadian Navy's Joint Support Ship. Users can explore more than 400 compartments and exterior spaces in a realistic, high-fidelity virtual environment.

Built with a user interface inspired by modern gaming, V-Ship offers an intuitive and responsive experience designed to keep users engaged.

Benefits of V-Ship

- Delivers immersive training from any location with a laptop
- Offers guided scenario-based training and open free-roam exploration
- Enhances shipboard orientation with access to 2D schematics
- Reduces costs associated with live ship access and travel
- Scales easily to different vessels and mission profiles

V-Ship offers two core modes

Scenario
Structured, step-by-step training activities

Free Roam
Open exploration for situational awareness and familiarization

The platform includes **integrated 2D schematics** to support spatial awareness and contextual learning.

Training can take place anywhere using a standard laptop, enabling flexible deployment in classrooms, at sea, or remotely. While featuring the JSS, the V-Ship Virtual Platform can be adapted to represent any vessel or operational platform.

Bluedrop's V-Ship Platform marks a new era in naval training—delivering realism, flexibility and capability in one powerful solution.
